About This Game

One day Reven awakens in a strange but beautiful place where the young teenager is treated like a very special guest. There are talking animals, each being rather kind and friendly. Unless the door is mentioned. The one in the back of the garden. But what could be behind that mysterious door? And why Reven isn't allowed to go out? You shouldn't try to know the truth...

Garden of Oblivion is a visual novel/point & click hybrid with horror elements.

- Move around and question the animals
- Solve some puzzles and try to unveil the garden's secrets
- Two different endings are available: Reven's fate is in your hands

It was originally created in a weekend for Ludum Dare 30 with "Connected Worlds" as a theme.

Title: Garden of Oblivion
